PROFESSIONAL SUMMARY

Fresher AI/ML Engineer with strong hands-on experience in machine learning, deep learning, natural language processing, and data analytics. Proficient in Python, SQL, CNN architectures, anomaly detection, and AI-based recommendation systems. Experienced in developing end-to-end ML solutions including data pipelines, RESTful APIs, dashboards, and cloud deployment using real-world datasets.

EDUCATION

Bachelor of Engineering in Artificial Intelligence and Machine Learning
Vemana Institute of Technology, Bengaluru

2021 – 2025

PROJECTS

User Behavior Tracking and Anomaly Detection using Machine Learning

- Designed an ML-based system to monitor user activity logs and detect abnormal behavior patterns.
- Extracted behavioral features such as login frequency, session duration, and access patterns.
- Implemented a Decision Tree Classifier to classify user behavior into normal and suspicious categories based on learned decision rules.
- Achieved 12–15% higher anomaly detection accuracy compared to traditional threshold-based methods.
- Developed a Flask REST API for real-time predictions and integrated PostgreSQL for data storage.
- Built dashboards to visualize anomalies, trends, and user risk scores.

Brain Tumor Detection using Deep Learning

- Developed a CNN-based deep learning model to classify MRI brain images into tumor and non-tumor classes.
- Performed image preprocessing, normalization, and data augmentation to reduce overfitting.
- Evaluated the model using accuracy, precision, recall, and F1-score metrics.
- Achieved 94% classification accuracy and improved detection precision by 10%.
- Deployed the model using a Gradio interface for real-time image upload and prediction.

Intelligent Resume Screening and Job Matching System using AI

- Developed an AI-powered system to automatically screen resumes and match candidates with job descriptions.
- Applied NLP techniques including text cleaning, tokenization, lemmatization, and TF-IDF vectorization.
- Implemented cosine similarity and ML-based ranking to score and rank resumes based on relevance.
- Designed a scalable backend pipeline to process multiple resumes efficiently.
- Built a Streamlit-based interface for resume upload, job description input, and match score visualization.
- Reduced manual resume screening effort by over 60%.

EXPERIENCE

Generative AI & Data Analytics Intern

Unifirst Robotics, Bengaluru

Oct 2023 – Nov 2023

- Analyzed 50,000+ data records to identify operational and business trends using ML techniques.
- Designed interactive Tableau dashboards to present insights to business stakeholders.
- Applied synthetic data generation techniques to improve dataset diversity and model robustness by 20%.
- Automated data analysis workflows, reducing manual reporting time by 40%.
- Collaborated with cross-functional teams to support data-driven decision-making.

AI/ML Intern

Rooman Technologies, Bengaluru

Sep 2024 – Feb 2025

- Developed supervised and unsupervised ML models for classification and regression tasks.
- Built reusable preprocessing pipelines including scaling, encoding, and missing value handling.
- Evaluated models using cross-validation and performance metrics such as accuracy, RMSE, and F1-score.
- Deployed trained models using RESTful APIs for real-time predictions.
- Optimized inference pipelines, reducing response latency by 30%.
- Documented ML workflows and assisted in training junior interns.

SKILLS

- **Programming Languages:** Python, SQL, HTML, CSS
- **Machine Learning:** Supervised Learning, Unsupervised Learning, Feature Engineering, Model Training, Model Evaluation, Hyperparameter Tuning
- **Deep Learning:** Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), TensorFlow, Keras, Hugging Face transformers
- **Natural Language Processing:** Text Preprocessing, Tokenization, Lemmatization, TF-IDF, Cosine Similarity, Resume Parsing, Job Matching
- **Computer Vision:** Image Processing, Image Classification, OpenCV
- **Frameworks & Libraries:** Scikit-learn, Pandas, NumPy, Flask, Streamlit, Gradio
- **Databases:** MySQL
- **Data Visualization:** Power BI, Excel, Matplotlib
- **Deployment & Tools:** REST APIs, Model Deployment, Git, Streamlit Cloud

KEY ACADEMIC COURSEWORK

- Artificial Intelligence
- Machine Learning Algorithms
- Deep Learning and Neural Networks
- Natural Language Processing
- Data Structures and Algorithms
- Database Management Systems
- Probability and Statistics

ACHIEVEMENTS & RESPONSIBILITIES

- Successfully completed multiple end-to-end AI/ML projects using real-world datasets.
- Actively participated in AI workshops, technical seminars, and coding activities.
- Assisted peers in understanding Python and ML fundamentals.
- Maintained consistent academic performance throughout the AIML program.

SOFT SKILLS

- Analytical Thinking
- Problem Solving
- Team Collaboration
- Communication Skills
- Time Management

CERTIFICATIONS

- Advanced Learning Algorithms – Coursera
- Data Analyst Certification – One Roadmap
- Artificial Intelligence Foundation – Infosys Springboard
- Introduction to Deep Learning – Infosys Springboard
- Introduction to Natural Language Processing – Infosys Springboard
